### **Notice Regarding Completion of Investment in TechDoctor, Inc.**

Ono Digital health Investment, GK ("ODHI", a wholly-owned subsidiary of Ono Pharmaceutical Co., Ltd.) has completed its investment in TechDoctor, Inc. (Chuo-ku, Tokyo; CEO: Kazumichi Minato; "TechDoctor").

ODHI is a corporate venture capital "CVC" firm that invests in venture companies in the healthcare field other than the pharmaceutical business. ODHI has invested in TechDoctor because the "SelfBase" and "Health Portal" digital platforms were developed under the company's vision of "the future of improved health through data" and it believes the platforms contribute to the healthcare field by contributing to the extension of healthy life expectancy and striving toward a sustainable society.

TechDoctor's SelfBase is a digital biomarker\* development platform that enables easy visualization and analysis of continuous and long-term data acquired from multiple wearable devices and medical equipment. SelfBase is used across various industries, including pharmaceutical companies and medical/research institutions. In addition, Health Portal is a platform that uses data for healthcare services, health policies, and programmed medical devices (SaMD). By linking accumulated device data and incorporating digital biomarkers, it can provide new value to users.

Going forward, ODHI will continue to invest in and collaborate with promising companies like TechDoctor -- in Japan or overseas -- that meet patient needs; pursue better health for patients and those who support them; promote Ono Pharmaceutical's CSR activities; and contribute to sustainable development goals (SDG). Through these efforts, it aims to extend healthy life expectancy and realize a sustainable society.

\* Digital biomarker: Indicators that obtain and analyze data obtained acquired by digital devices such as wearable devices to objectively visualize the presence or absence of diseases and changes caused by treatment.
